CABLE RAILING

ATTILA | ELLAC | RUGA

Cable railing is growing in popularity

Modern and contemporary, providing a unique, discreet appearance.

ATTILA

- PalmSHIELD's exclusive cable railing product
- Utilizes a single cable design
- Cable is attached at top of the panel, then strewn back and forth over a series of spools
- Only requires one tensioner at the bottom
- 1/8 or 3/16 stainless steel cable
- Aluminum posts

ELLAC

- PalmSHIELD's hinged cable railing system
- Utilized in areas with a slope or radial occurrence
- Between each post is a centered mid post that keeps the cables aligned and secured
- Field adjustable
- 1/8 or 3/16 stainless steel cable
- Aluminum posts

RUGA

- PalmSHIELD's traditional cable railing system
- Very common, though not ideal for all projects
- Requires numerous turnbuckles and a top and bottom rail for tension support
- Field or shop fabricated
- 1/8 or 3/16 stainless steel cable
- Aluminum posts
