

PalmSHIELD

ARCHITECTURAL SCREENING

PERFORATED METAL SCREEN

With a variety of hole sizes, percentage of open area, high strength-to-weight ratio and aesthetically pleasing design, PalmSHIELD's *CHARLEMAGNE* perforated metal screening has endless applications such as enclosures, partitions, sign panels, guards, screens, playgrounds and more.

PalmSHIELD has been incorporating perforated metal panels in our robust PalmSHIELD exclusive frames and column systems for over twenty years. *CHARLEMAGNE* perforated infill is perfect when you want to show a silhouette of what is behind your screening but nothing more.

PalmSHIELD's custom perforation presses are capable of producing a wide variety of designs:

ROUND

SQUARE

HEXAGON

SLOTTED

DECORATIVE

CHARLEMAGNE perforated metal sheet specifications:

<u>THICKNESS</u>	<u>HOLE SIZE</u>	<u>HOLE CENTER</u>
.032" – .25"	3/32" – 1"	1/8" – 1 1/4"

Holes may be staggered, straight or staggered vertically.

PalmSHIELD provides a wide array of architectural screening options in our exclusive framework system. The *CHARLEMAGNE* system incorporates our proven PalmSHIELD fully framed panels, engineered plated posts, our Gorilla hinges and the Locinox re-keyable, auto latch lock system
